RIDUZIONE DELL' IMPATTO AMBIENTALE

Party Style vuole essere sinonimo di stile nel massimo rispetto per l'ambiente. È a questo principio che si ispira la progettazione del prodotto e l'intera gestione dei cicli produttivi. Come strumento di misura delle proprie performance in campo ambientale, l'Azienda ha adottato da anni il sistema di gestione ISO 14001 e gli standard internazionali di LCA (Life Cycle Assessment), questi ultimi per misurare l'impatto ambientale del prodotto. Sono proprio i test di LCA che dimostrano una sensibile riduzione dell'impatto ambientale del prodotto anche a confronto con i prodotti analoghi di natura compostabile.

LOW ENVIRONMENTAL IMPACT

GOLDPLAST wants to represent a style concept in respect of the environment: design and all the stages of production are guided by this principle. Since last years, the Company has adopted the Management System ISO 14001 and the international standards certified by the LCA (Life Cycle Assessment) to ensure the monitoring of the environmental impact of the products. LCA tests show a significant reduction of the environmental impact of the products, even if compared to the similar and compostable ones.

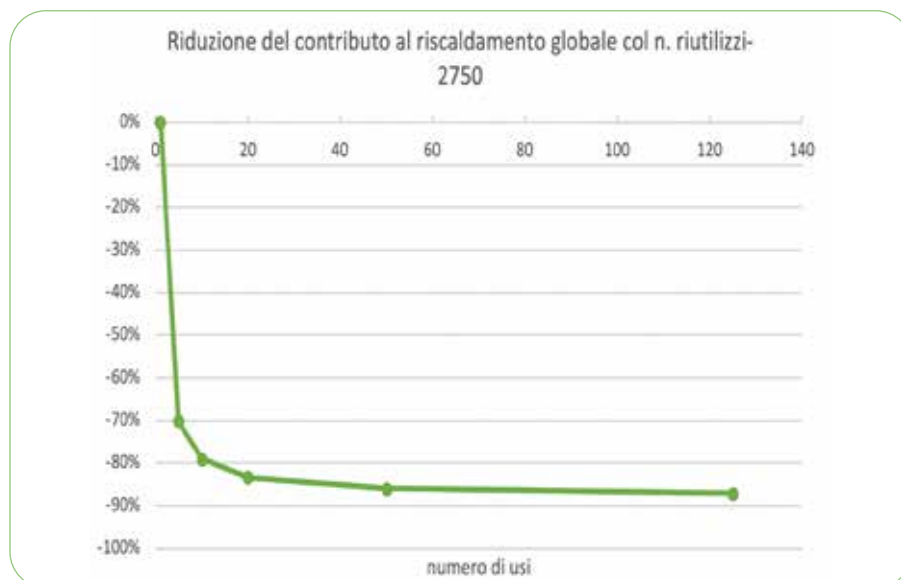

RÉDUCTION DE L'IMPACT ENVIRONNEMENTAL

Party Style veut être synonyme de style avec le plus grand respect de l'environnement. Ce principe s'appuie sur la conception du produit et de l'ensemble de la gestion des cycles de production. En tant qu'outil de mesure de la performance environnementale, la société a adopté le système de gestion ISO 14001 et les normes internationales d'ACV (Analyse du Cycle de Vie), ces dernières permettant de mesurer l'impact du produit sur l'environnement. Ce sont précisément les tests d'ACV qui démontrent une réduction significative de l'impact du produit sur l'environnement, également par comparaison avec des produits similaires de nature compostable.

REDUZIERUNG DER UMWELTBELASTUNG

Party Style möchte mit Stil und Respekt für die Umwelt gleichbedeutend sein. Dieses Prinzip basiert auf dem Produktdesign und der gesamten Steuerung der Produktionszyklen. Als ein Instrument zur Messung der Umweltleistung hat das Unternehmen das Managementsystem ISO 14001 und die internationalen Standards der Ökobilanzierung (Life Cycle Assessment) eingeführt, wobei letztere die Umweltauswirkungen des Produkts messen soll. Genau die Ökobilanztests zeigen eine signifikante Verringerung der Umweltauswirkungen des Produkts, auch im Vergleich zu ähnlichen Produkten, die kompostierbar sind.

Mineral Collection

La gamma Mineral nasce dall'unione tra un polimero altamente performante quale il Polipropilene e il Talco Micronizzato di grado alimentare, un minerale che permette di ridurre il consumo di materie prime da fonti fossili e, al tempo stesso, aumentare la durezza e la resistenza del manufatto. Composta da diverse forme e colori, si fa apprezzare particolarmente in contesti che richiedono sicurezza assoluta al contatto alimentare, infrangibilità ed estrema praticità d'uso, pur mantenendo un posizionamento di prezzo tra i più bassi della categoria. Picnic, barbecue, ristorazione commerciale e collettiva o ristorazione sui mezzi di trasporto, la gamma Mineral si fa valere ovunque servano praticità e sicurezza, specialmente dove c'è un bambino.

 *The Mineral range is born from the union between a high performance polymer such as polypropylene and food grade micronized talc, a mineral that allows to reduce the consumption of raw materials from fossil sources and, at the same time, increases the toughness and resistance of the product. Composed of different shapes and colors, these products can be appreciated especially for their absolute safety to food contact, unbreakability and extreme practicality of use, while maintaining a price positioning among the lowest in the category. Picnics, barbecues, commercial and collective catering or food truck catering, the Mineral range is the perfect fit wherever practicality and safety are needed, especially where there is a child.*

 La gamme Minéral est née de l'union entre un polymère hautement performant tel que le Polypropylène et le Talc Micronisé de degré alimentaire, un minéral qui permet de réduire la consommation de matières premières à partir de sources fossiles et, en le même temps, augmenter la dureté et la résistance de l'article. Composée de différentes formes et couleurs, elle se fait particulièrement apprécier dans des contextes qui exigent sécurité absolue au contact alimentaire, incassabilité et extrême praticité d'utilisation, tout en maintenant un positionnement de prix parmi les plus bas de la catégorie. Pique-nique, barbecue, restauration commerciale et collective ou restauration sur les moyens de transport, la gamme Mineral s'affirme partout où la praticité et la sécurité sont nécessaires, surtout lorsqu'il y a un enfant.

 *Die Mineral-Serie ist aus der Kombination eines Hochleistungspolymeres wie Polypropylen und Micronized Talc entstanden, ein Mineral, das den Verbrauch von Rohstoffen aus fossilen Quellen reduziert und gleichzeitig die Härte und Beständigkeit des Polymers erhöht. Die Linie besteht aus verschiedenen Formen und Farben, schätzt man es besonders in Kontexten, die absolute Sicherheit im Kontakt mit Lebensmitteln, Unzerbrechlichkeit und extreme Anwendbarkeit erfordern, während eine Preispositionierung unter den niedrigsten in der Kategorie beibehalten wird. Ob Picknicks, Grillen, gewerbliche und kollektive Verpflegung oder Verpflegung auf Transportmitteln, gilt die Mineral-Serie überall dort, wo Zweckmäßigkeit und Sicherheit gefragt sind, insbesondere dort, wo ein Kind lebt.*
