Water Paper è la prima carta a secco realizzata senza lattice e per questo biodegradabile, compostabile ma soprattutto idrosolubile. Questo permette di smaltire il prodotto sia nella carta che nell'umido, nel rispetto delle vigenti normative ambientali, garantendo così anche un vantaggio economico.

Chi sceglie questa tipologia di prodotto esprime sensibilità e rispetto per la natura; qualità che oggi vengono molto apprezzate. Water Paper is the first airlaid made without latex and, therefore, biodegradable, compostable and above all water-soluble.

This property allows the product to be disposed of, in compliance with the current ecological regulations, both in the wastepaper and organic bin, guarantying also an economic profit. Whoever chooses this type of product shows sensitivity and respect for the environment; nowadays these qualities are highly appreciated.

Tale fibra è una delle più sostenibili in natura poiché, grazie alla rapida vegetazione della pianta, la cellulosa ricresce in un breve periodo di tempo. Tutta la linea Ecobambook è caratterizzata da una morbidezza ineguagliabile abbinata a una resistenza incredibile.

Ecobambook products are made of vegetable fibres and, therefore, biodegradable and compostable. airlaid easy

I prodotti in Airlaid si distinguono per la piacevolezza al tatto e la consistenza dello spessore. Questo tipo di carta sostituisce i tradizionali tessuti della tavola mantenendo al tempo stesso uno stile elegante e moderno. Nella linea Easy troviamo fantasie frizzanti facilmente coordinabili anche con le tinte unite per creare una tavola sempre nuova e personalizzata.

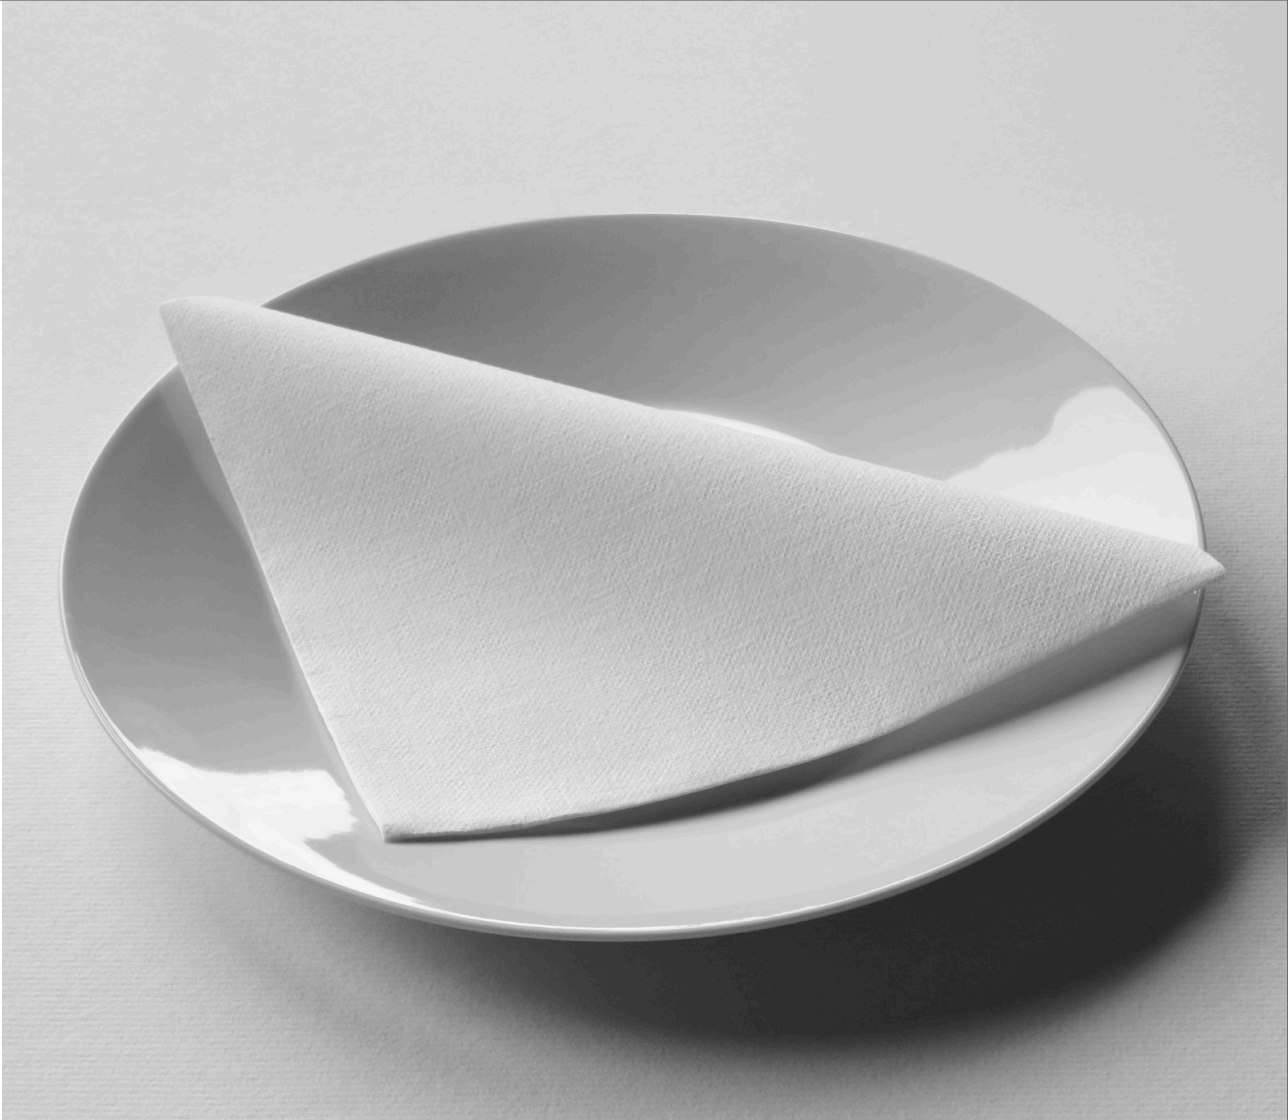

Airlaid products stand out for their pleasant feel and thickness. Not only does this type of paper replace traditional table fabrics but also maintains an elegant and modern style. The Easy collection offers lively patterns easy to match with solid colours to create an ever new and personalised table.
